## Why

- Sharing and disseminating knowledge, experience and results
- Impact
- Acceptability
- Support a growing and necessary industry

## How

- Sharing news and updates
- Events and match-making
- Statements
- Dialogue with decision-makers

# Norway's Polytechnic Society

- Norway's Polytechnic Society is the member network that inspires a science-based and sustainable development, through technology and entrepreneurship since 1852.
- The Polytechnic Society is independent, interdisciplinary and non-commercial, and has over 2000 personal, corporate and organizational members.
- The Polytechnic Society is made up of professional networks with their own boards, that provide high quality and relevance. The member networks provide meeting places, projects and partnerships across sectors.
- HM The King Harald and HRH the Crown Prince Haakon are honorary members, and HM The King grants the Polytechnic Society's President and Secretary-General audience at the Royal Palace twice a year.
- The years to come will be about creating solutions for the UN Sustainable Development Goals through technological advances, good governance and partnerships locally and globally. With 167 years of vitality, the Polytechnic Society is well equipped for the task.
